Personal information

Now I'm developing the Alice - voice assistant by Yandex. I find it challenging, so it stimulates to figure out the better solutions. I prefer product development rather than infrastructure. My C++ code is under NDA and pet-projects are on the GitHub.

Work experience

September 2021 – present

Junior backend developer

Yandex (Russia), SmartTV backend team

- I'm developing the video scenario of Alice in smart devices. (C++)

June 2021 – September 2021

Intern

Yandex, search department

- Development at the service stability team. Worked on the instruments for incident handling in Yandex. (Python)

November 2020 – May 2021

Python tutor

Online programming school "Kodland"

- Taught 11-16 aged students to program on Python (syntax, data, cycles, lists, functions, PyGame).

Education

2019 – 2023

Higher school of economics

Tikhonov Moscow Institute of Electronics and Mathematics, Moscow - bachelor

2021 – 2022

Introduction to Data Analysis, minor

Skills

C++

Now it's my current programming language. Completed the specialization "C++ modern development" created by MIPT and Yandex on the Coursera.

- C++20, STL
- gRPC

Python 3

I use Python to solve some certain problems in which memory and time are not critical.

- asyncio, aiohttp, aiogram
- FastApi, Django
- Pydantic, SQLAlchemy, alembic, asyncpg
- numpy, pandas, sklearn, pytorch

Computer Science

Linux, Unix

- bash, git
- json instead of protobuf
- Unix
- Docker, CI/CD in GitHub

My competencies

Team work, planning, client-orientation, self-development.
